DEVELOPMENT !!!!**

# WHAT IS WEB DEVELOPMENT ??

- Web development, also known as web development, refers to the tasks involved in creating, creating, and maintaining web pages and web applications that run online in a browser. However, it can also include web design, web programming, and database management.
- Web development is closely related to the work of designing application functions and features (web design). The term development is usually reserved for the actual construction of these things (i.e. programming of the pages).you need to specify your digital marketing goals i.e. what you want to achieve with digital marketing. Some common examples are: to increase brand awareness, make more sales, or grow your community.
